Alexander's Prolific.  
Seneca Beauty.  
Rose of Erin.

## SELECTED SEED POTATOES

### A SPECIALTY.

Northern Grown Seed Potatoes are universally acknowledged to be the very best. Grown in the cold North East, where nature and the elements alike decline existence to all but the very hardiest varieties, they inherit those stable qualities which make incontestable their position as leaders in the Seed Potato World. We make a specialty of and handle this seed solely. The prices on this class of seed may rule somewhat higher than Western and home grown stocks; but when quality and productiveness are considered, they will be found by far the cheapest and most remunerative to growers. We advise those in need of first-class potatoes for seed to give us a trial.

✻ ✻ ESTABLISHED 1876. ✻ ✻

..1902..

## I. W. SCOTT & CO.'S Market Gardeners' Price List of Seeds.

We take pleasure in presenting our SPECIAL PRICE LIST FOR 1902. We do not claim to compete in prices with all other dealers, but do claim to buy and sell the very best Seeds that can possibly be produced, and that are suited to experienced private planters and critical market gardeners.

It is our constant aim to make quality a first consideration. The best is always the cheapest. Reliable seeds cannot be sold at half price. Our Seed Department is in charge of practical seedsmen, who have had many years of experience in supplying the gardeners of Western Pennsylvania with seeds, especially the market gardening trade in the vicinity of Pittsburgh.

Thanking you for a generous patronage in the past, and soliciting your orders for the coming season, we are,

Very respectfully,

I. W. SCOTT & CO.

### REMARKS TO PURCHASERS.

**SEEDS BY MAIL.**—Sending Seeds by mail is a very important branch of our business, and we are fully prepared to fill all orders promptly and correctly. The postage is but 8 cents per pound, and our customers living at a distance from a railroad station will find this a convenient and safe way to get what seeds they want. For Peas, Beans and Corn add, 15 cents per quart to prices quoted.

**REMITTANCES** can be made by postal money order, bank draft, registered letter, express company's money order, or by express.

**SHIPPING INSTRUCTIONS.**—When goods are to be shipped by freight or express, give plain shipping instructions. Otherwise we use our own judgment in this matter.

**ORDER EARLY.**—Please send us your orders as early as possible, and thus enable us to make prompt shipment, and what is still of more importance, you will have the Seeds on hand when you need them.

**TERMS.**—Parties unknown to us will please send money as above stated, or satisfactory reference with order.

## GARDEN SEEDS

### For Market Gardeners.

We have made the lowest prices possible consistent with first-class quality, but we cannot in the matter of price compete with rubbish, sure to disappoint the planter and result in losses far exceeding the total cost of good seeds.

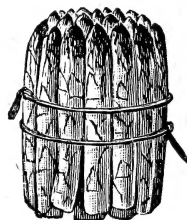

## VEGETABLE SEEDS.

Prices subject to change without notice. Quantities less than half-peck and quarter pounds will be charged at quart and ounce rates. Seeds in papers 5 cents each, except Cauliflower; for prices on this see under heading Cauliflower.

## ASPARAGUS.

Eight ounces of Seed to 100 yards of row; 15 lbs. to the acre.

	Oz.	$\frac{1}{4}$ lb.	lb.

Four pounds to the acre.

	Ounce.	$\frac{1}{4}$ Pound.	Pound.
White or Yellow .....	\$0 05	\$0 10	\$0 30

## MUSHROOM SPAWN.

French .....Per Brick, 15 cents.

MUSHROOMS.

### How to Grow Mushrooms.

Very little need be said about the style of house needed for growing mushrooms. Any outbuilding, cellar, or under the benches of a cool greenhouse, any place where a temperature of 40 to 55 degrees can be maintained, providing the place is dry, mushrooms can be grown.

#### Preparing the Manure.

Use eight inches of rough manure in the bottom of the bed and four inches of finer manure mixed with soil on top. Collect the rough material just as though to make up a hotbed. Having the manure quite wet, put in a pile to heat and turn over as needed to keep it from burning. If at any time it should become dry, it should be given a good hosing—not a sprinkle. The fine manure consists of pure horse droppings, or as clean from straw as can be had; to this put one part of soil to four parts of manure, putting in a part of soil at each turning until the quantity of soil is given. It is well to prepare the manure in an open shed; this keeps the weather away from it and it is less liable to get dry or over wet. Keep the hose on it if it should get dry; more failures arise from the manure being too dry when put in the bed than from any other cause. A good size to break up the spawn is to make 15 pieces out of each brick; as it is rather hard, a hatchet should be used to mark it off; it is then easily broken with the hand. Break up as much as is needed to spawn the bed, fill it in a basket, begin at one end of the bed and lay the pieces (which will be about the size of a hen's egg) eight inches apart all over the bed.

There is nothing to hinder anyone from growing a crop of mushrooms if these simple directions are followed.

## OKRA.

Twelve ounces of Seed to 100 yards of row.

20 pounds to the acre.

	Ounce.	$\frac{1}{4}$ Pound.	Pound.
Long Green .....	\$0 10	\$0 15	\$0 50

## FLOWER SEEDS.

### SWEET FLOWERING PEAS.

Every One Who Cultivates Flowers Should Plant Sweet Peas.

The Sweet Pea is one of the most popular flowers in cultivation and numbers among its enthusiastic admirers thousands of skillful cultivators. It is a free flowering climber, and considered one of the best annuals that enrich the flower garden.

Early in spring make a trench about six inches deep, in rich, mellow soil, so arranged that no water can stand in it, and plant the seed in the bottom, taking care not to cover it more than two inches. When the plants are about five inches high, fill up the trench, and furnish some support for the vines to run upon. The flowers should be picked

before they form pods, or the plants will soon stop flowering.

## No. 10 C, Wiard One-horse Garden and Vineyard Chilled Plows—Right Hand.

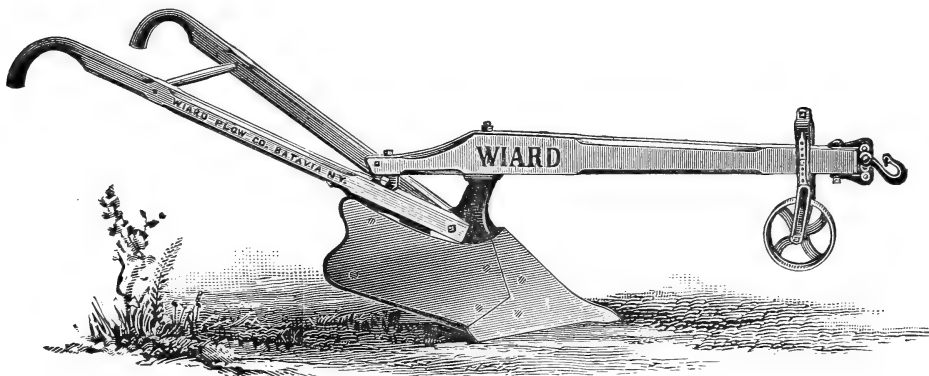

No.	Size.	Capacity.	Weight with Clevis.
10C,	One-horse,	4 to 7 inches deep, 6 to 11 inches wide,	77 lbs.

This plow has adjustable beam, automatic wheel and Scotch clevis. It has handles that shift from left to right, so that the plow can run close to trees, hop poles, vines, etc., especially adapting it for vineyard work, as it can be run under grape trellis wire. The handles also adjust in height for a tall man or a short boy.

Price:	Plain, Without Wheel and Jointer	-	-	-	\$ 7.00
"	With Wheel	-	-	-	8.00
"	" " and Jointer	-	-	-	10.00

## No. 21, Wiard Patent Swivel Plow—One-horse.

By an ingenious but simple device attached to the No. 21 one-horse plow it can be used with the horse walking in the furrow, a great convenience for garden and vineyard work, and can be used with two horses when an exceedingly light two-horse swivel plow is wanted.

Price:	With Wheel	-	-	-	-	\$8.50
"	Without Wheel	-	-	-	-	7.50

## THE WIARD PATENT SWIVEL PLOW.

With Chilled Mold-Board and Automatic Jointer or Coulter.

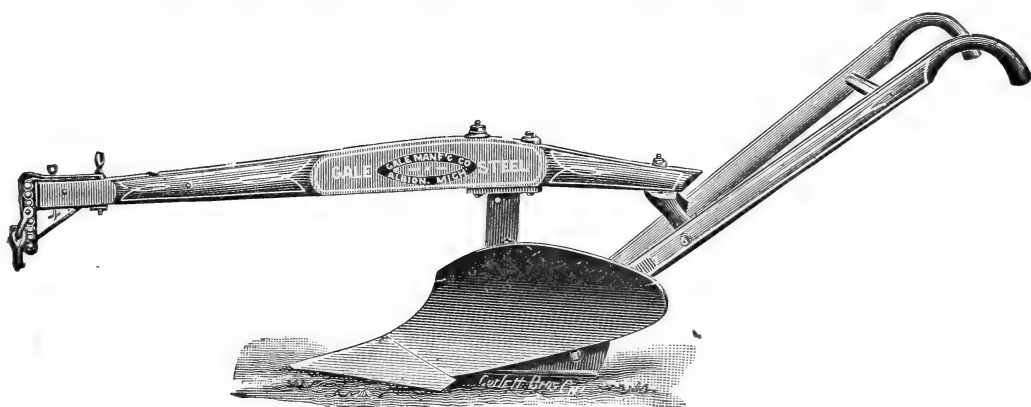

Patented August 3d, 1886, and July 17, 1888.

No. 140 TWO-HORSE.

This cut shows our Swivel Plow rigged with Jointer, Wheel and Patent Adjustable Clevis, by which the Plow is caused to take more or less land, at the will of the Plowman, entirely overcoming all objections to its use on level land. These Plows are also used for flat or level land plowing, and we can heartily recommend them. Price as above described, \$12.00. If Wheel is not wanted, deduct \$1.00; if Jointer is not wanted, deduct \$2.00.

## THE CELEBRATED GALE CHILLED PLOWS.

The Gale Chilled Plows are too well-known for us to describe them here. We keep an assortment of all sizes on hand, and pronounce them the best Plow made for general purposes.

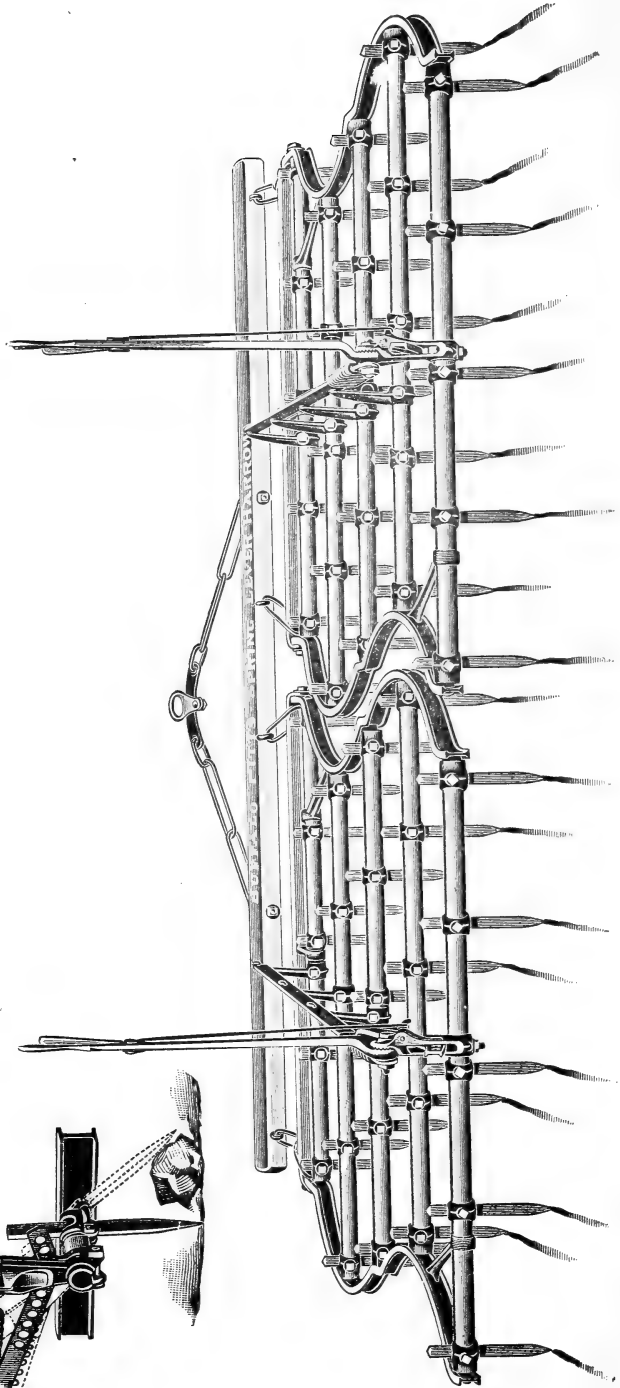

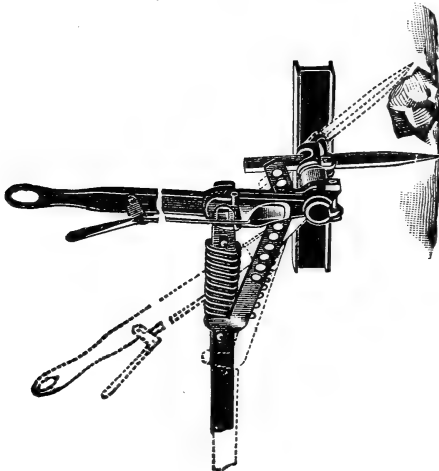

**PRICES UPON APPLICATION.**

## HOOSIER ONE-HORSE HOE CORN DRILL.

With or without Fertilizer Attachment.

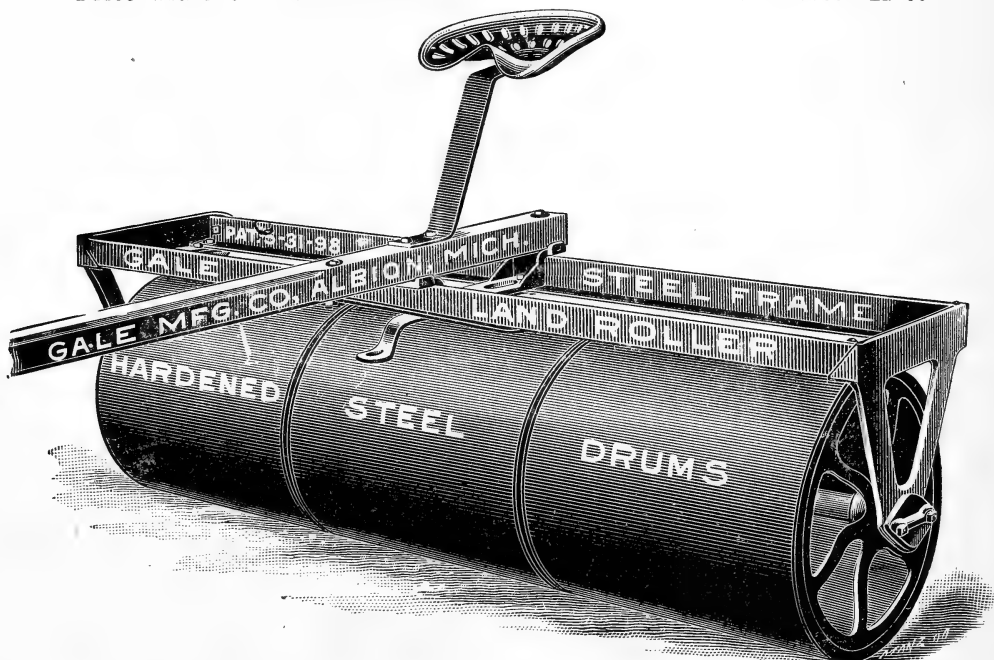

Our One-Horse Corn Drill is the most popular tool of the kind made, and is noted for its excellence and general good qualities. It is now made entirely of steel and iron, with the exception of the handles, and the material is distributed in such a way as to give the greatest strength and the least weight possible. It is, therefore, strong and light. The material used is the best possible to obtain for the purpose. All

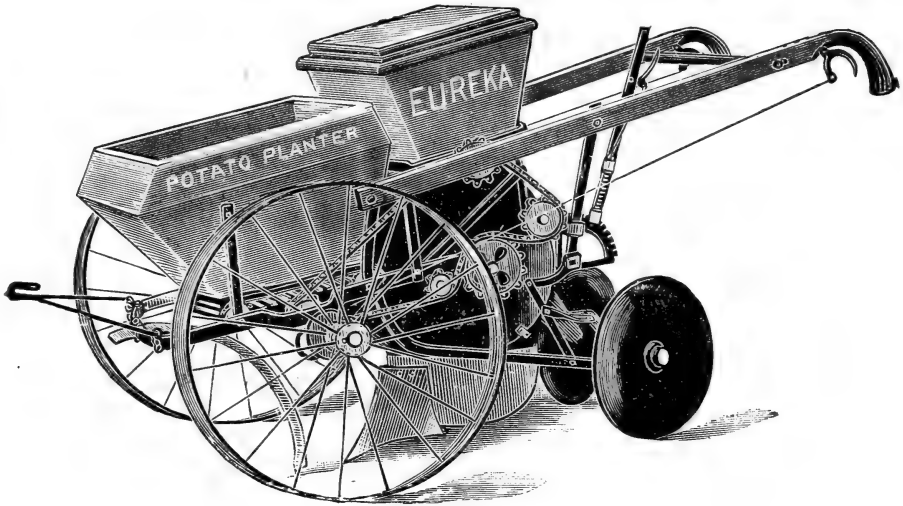

R. J. SMITH - CO. CHICAGO.

wearing parts, such as the hoes, coulters, shoes and covering shares, are made from high grade steel, that insures the greatest possible amount of wear. We also sell the Celebrated Hoosier Grain Drill. All Sizes and Styles.

Price with Fertilizer Attachment .....	\$15 00
Price without Fertilizer Attachment .....	12 00

Gale 7 foot Steel Land Roller .....	Price \$22.00
-------------------------------------	---------------

### DESCRIPTION.

The machine is mounted on two wheels of large diameter, as will be seen by the Cut, which occupy a position at each side and carry the planter steady. The potato hopper has a traveling bottom, and a self-acting governor operating in connection therewith, allowing only the required amount of potatoes to be carried from it into the picker box. The pickers revolve in the small quantity of potatoes in the picker box, and each one carries a potato up over and drops it into the furrow opened by the shoe. The depth of covering is regulated by a handy lever. The discs revolving each side of the furrow in the rear of the machine covers the fertilizer and potatoes. The machine is thrown in and out of gear by a little hand check upon the left hand handle. All the mechanism is operated by the two large drive wheels through sprocket chain attachment. It is a simple machine, all changes quickly and easily made.

It is light, strong and durable.  
 It weighs with fertilizer attachment, 200 pounds.  
 It is light draft for one horse.  
 It is 95 per cent correct in its drop.  
 It covers perfectly.  
 It will sow fertilizer correctly.  
 It will sow from 150 to 700 pounds fertilizer per acre.  
 It plants whole or cut seed.  
 It will plant any depth required.

It will drop seed in the row any distance desired apart.  
 It will hold one bushel and one quarter of potatoes.  
 It will hold 50 pounds of fertilizer.  
 It is made with or without fertilizer attachment.  
 It turns easily at the end of row.  
 It is sold at a nominal price.  
 It has marker for marking return row.

The furrow is opened by the shoe. The potato is dropped equi-distance apart, as regulated. The potato is partially covered by earth; the fertilizer is dropped and does not come in contact with the potato; the discs cover both potatoes and fertilizer any depth desired.

**We Guarantee the Eureka Potato Planter to be as represented.**

PRICE { \$40.00 with Fertilizer Attachment.  
           \$37.00 without Fertilizer Attachment.

# THE PLANET JR. GOODS.

## THE GOOD GARDEN

presumes good planting and good cultivation. The best, safest and surest way to secure these results is from the use of the "Planet Jr." No. 4 Combined Hill and Drill Seeder, Single Wheel Hoe, Cultivator and Plow as shown below. The hopper holds two quarts of seed and will sow any garden seed in continuous rows, or drop it in hills, at five different distances. The index is tested and accurate, and the drill will in every case sow the amount of seed desired. Simply lifting the handles throws it out of gear. When ready to cultivate take off seed box and put on tool frame and it is ready for cultivating between or astride the rows, hilling up, plowing, etc. No tool has ever been made to equal it for the home, gardener or small farmer.

Write at once for new 1902 catalogue. It tells all about "Planet Jr." Seed Drills, Wheel Hoes, Horse Hoes, Cultivators, Two-Horse Cultivators, Sugar Beet Seeders and Cultivators, etc. We mail a copy free.

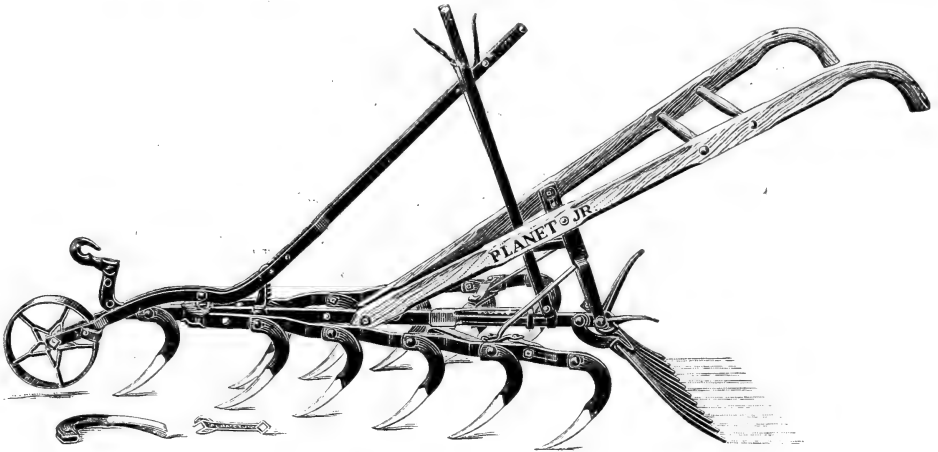

*Two Gold Medals at Paris Exposition; Highest Award.*

Complete, \$8.00.

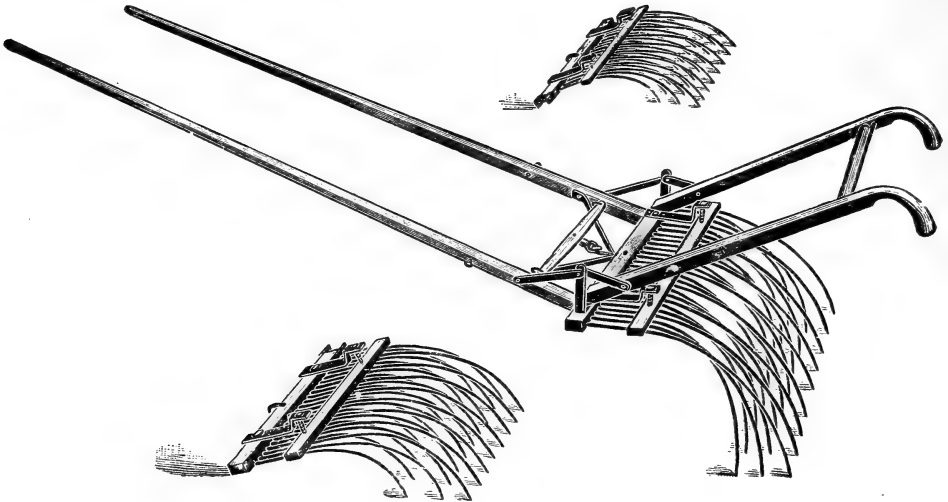

## PLANET JR.

No. 8 Horse Hoe and Cultivator.  
Price, With Attachments As Shown In Cut, \$8.00.

The PLANET JR. Catalogue for 1902 Will Be Sent Free Upon Request.

## EUREKA SECTIONAL ADJUSTABLE WEEDER.

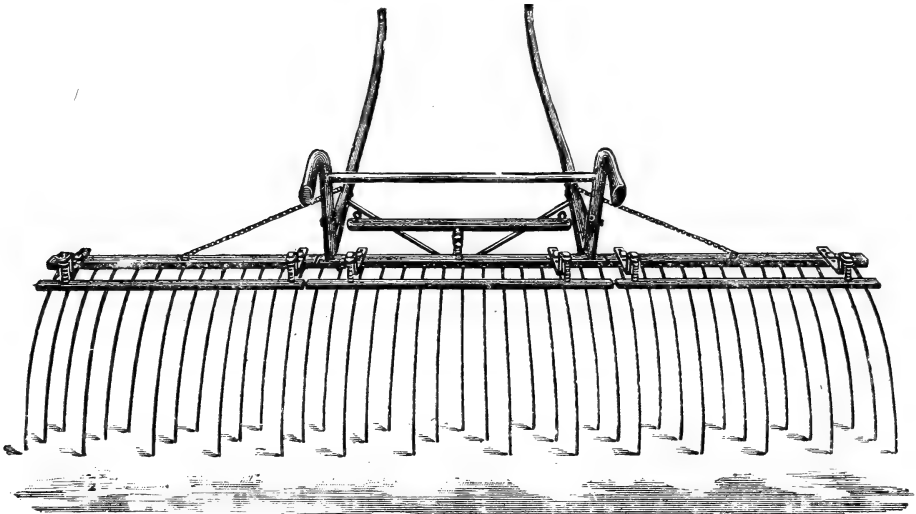

Cut Showing Wings Detached. The Main Head, 2 feet 9 inches long, can be used as a Cultivator.

Any number of Teeth can be easily removed, as they are firmly held in pairs by a clip and one bolt. This is a very valuable feature, and will be highly appreciated by the farmer.

Shafts are Adjustable to the Height of any Horse.

Handles are Adjustable to the Height of any Man.

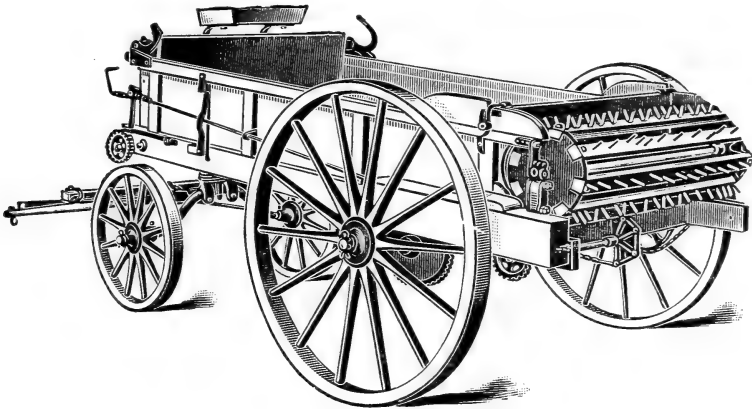

Cut showing Wings Attached. The Wings are Hinged to Main Head. A Solid Head can be made by putting in a Single Bolt on each Wing. Price, \$10.00.

Are you acquainted with the merits of the  
**20th Century Manure Spreader**

Do you know it will spread any and all kinds  
of farmyard manure in one-fifth the time and  
with one-tenth the labor required by hand?

As an enterprising farmer can you afford to be without a spreader?  
Would you do without your plow or mower? If you stop to reason the  
thing out, can you help concluding that the manure spreader is bound  
to become about the most important implement on the farm?

The 20th Century Manure, Lime and Fertilizer Spreader  
makes a manure pile as good as a bank account.

It is easily and conveniently operated by the driver from his seat.

It will spread broadcast or in rows, and thick or thin, as desired.

It is the only spreader having a tight box, thus saving all the manure, whether liquid or dry.

A team of horses and a boy-driver takes it anywhere, as the draft is remarkably light and the machine easily operated.

A postal brings a catalogue.

## BLACK DEATH.

Three years of unprecedented success wherever introduced all over the United States has proved "Black Death" to be an absolute annihilator of all insects, bugs or beetles that prey on vegetation.

It is an inexpensive powder as fine as flour and extremely diffusable, and completely covers with a fine dust all plants over which it is sprinkled. In addition to being powerful in its effects to kill all insect life, it also acts as a fertilizer, thereby very materially increasing the crops of potatoes, etc., to which it is applied.

### HOW TO APPLY.

The best way is to shake "Black Death" on the vines dry (never mix with water) early in the morning when damp with the dew or otherwise, and never when the plants are dry. Apply it with a "World's Best Sifter," which can be obtained at a small expense of dealers handling "Black Death," or it can be put on with a small Burlap, or other sack made of any moderately coarse cloth.

For potatoes we recommend to be used on the buggy portions from 10 to 15 pounds per acre, but if 20 to 30 pounds be applied all over it will be returned in an increased crop.
